Forecast for Saturday 02 Dec 2023

Weather: Mostly cloudy, some patchy light snow across Argyll, the Trossachs and Arran, rain at sea level near the coast, in the morning, but likely dry across Lochaber. Most ranges dry in the afternoon and evening. Best chance of sunshine across northern Lochaber particularly around the Nevis range and grey corries.

Chance of cloud-free hill tops above 800m: 70% across northern Lochaber. 40% further south.

Low Cloud and visibility: Good or very good visibility across northern Lochaber with hills likely to be free of cloud. Often poor visibility further south in low cloud and snow flurries, with cloud bases around 500m, but tops above 900-1000m likely to be above the cloud, especially in the afternoon and evening.

Met Office Aberdeen Meteorologist's View
Even light winds will give a bitterly cold feel. Best conditions towards the Nevis range, but a chance of a cloud inversion on the higher summits of Argyll and the Trossachs in the afternoon. Note, freezing level nearer 500-600m across Arran.

Forecast for Sunday 03 Dec 2023
Weather: Dry and cold. Generally bright with good sunny spells, best of these across Lochaber. Some low cloud or fog likely across Argyll and the Trossachs, but likely to rise and dissipate in the afternoon. Largely clear skies overnight.

Maximum wind: East, 5-10 mph.

Chance of cloud-free hill tops above 800m: 80% in the north, 60% in the south.

Low Cloud and visibility: Generally very good visibility across the tops. Lochaber hills likely to be cloud free. Some low cloud may affect the lower slopes across Arran, Argyll and the Trossachs, but tops above 700m likely to be above the cloud.

Temperature: **Glens:** Minus 2 Celsius rising to zero Celsius.
At 800m: Minus 2 or 3 Celsius.
Freezing level: Down to the glens, rising to 300m in the afternoon, but 400-500m over Arran.
